

OUTDOOR RECREATION

Courts for Municipal and Commercial Applications

World's Largest CourtBuilder™

Build a Better Court with the World's Leading Outdoor Sports Surfaces.

Installed **150 million sq. ft.**
That's enough to wrap around the globe.

More schools, community centers and park districts are replacing their old acrylic, concrete and asphalt recreation spaces with versatile Sport Court® modular outdoor playing surfaces.

Sport Court pioneered the concept of the modular outdoor game court in 1974.

Thoughtfully engineered, manufactured

and tested in Salt Lake City, Utah, our premium surfaces are the safest and most durable on the market.

Working with the world's largest network of local, certified CourtBuilders,™ trained by Sport Court, you can confidently provide the ideal playing surface for your community's children, teens and adults.

Made for Multi-Sport Play.

Transform your current single-sport basketball or tennis courts into lively multi-sport surfaces that offer more options for play. All Sport Court game courts can be easily configured to accommodate basketball, volleyball, pickleball, tennis and more, without compromising on playability or safety.

Multi-Sport Applications

- Basketball
- Volleyball
- Pickleball
- Tennis
- Hockey
- Futsal
- Handball
- Shuffleboard
- Hopscotch
- Tetherball
- Four Square
- Kickball

From Day Camp to Competition, Everyone in Your Community Wins.

Working with your local CourtBuilder,™ you can design a court to meet your recreation space and outdoor programming needs, including team sports, educational curriculum, group fitness, day camps and more. Upgrading to a Sport Court outdoor court will increase the use

of your facility's outdoor recreation area because it provides a safer experience for children, teens and adults and allows for more game options than single-sport courts. Sport Court surfaces also align with community environmental initiatives because they're 100% recyclable.

Quick installation and easy maintenance

Designed to fit your facility and budget

Supports Zero Waste initiatives

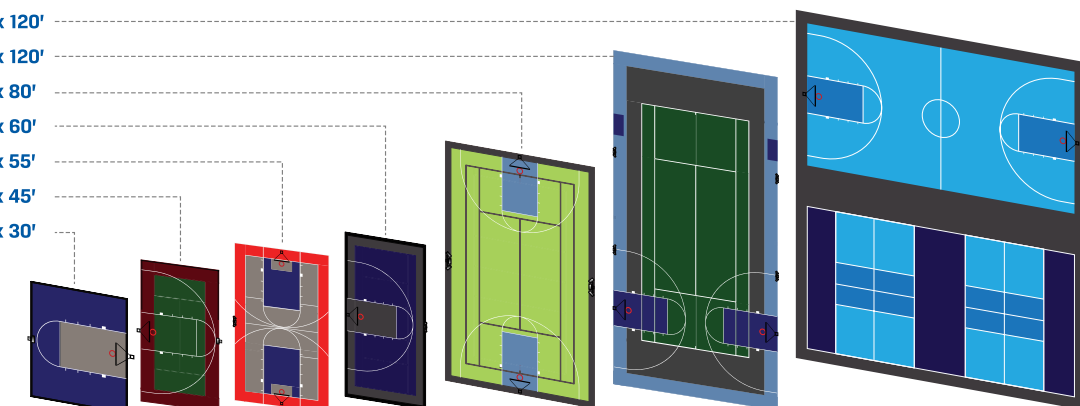

Safety

Fully Customizable Sizes:

- 100' x 120'
- 60' x 120'
- 50' x 80'
- 30' x 60'
- 35' x 55'
- 25' x 45'
- 25' x 30'

Your local CourtBuilder can assist with designing the right court for your specific needs.

Give Them the World's Safest Outdoor Court.

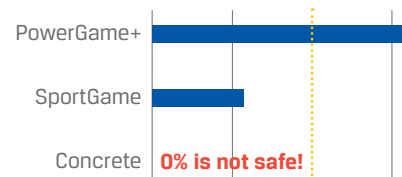

All Sport Court tiles provide exceptional protection against abrasions, head injuries and joint strain. Extensive third-party testing ensures that athletes of any age remain safe while playing and competing on Sport Court surfaces.

More Shock Absorption.

The most important safety consideration of any sports surface is shock absorption: the ability of the floor to absorb the energy of an impact. Sport Court surfaces feature patented, vertical shock-absorbing grids to reduce the risk of short- and long-term injuries.

Shock Absorption Level

ASTM F2772 Class 1 Standard

As an outdoor surface with 16% shock absorption, Sport Court PowerGame+™ far exceeds minimum safety standards and meets ASTM F2772 Class 1 classification, the safety standard for indoor sports floors.

With no shock absorption, concrete is not a safe sports surface.

Lateral Forgiveness.™

Too much lateral movement is like trying to change direction while running on ice; you keep sliding. Not enough lateral movement can create strain on your muscles and joints. Sport Court's Lateral Forgiveness feature allows for slight movement between tiles to absorb the transition forces generated from sudden shifts in direction, reducing the risk of muscle and joint injuries.

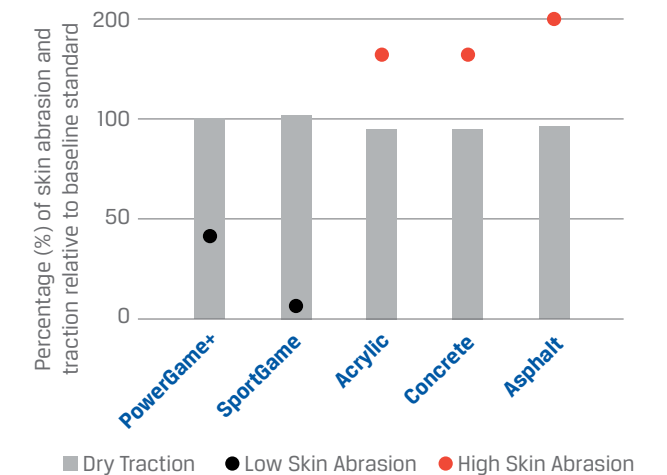

Lower Risk of Skin Abrasion.

Abrasions and scrapes can be common when slipping on a hard court. All Sport Court tiles feature specially designed surfaces that lower the risk of skin damage without compromising on traction.

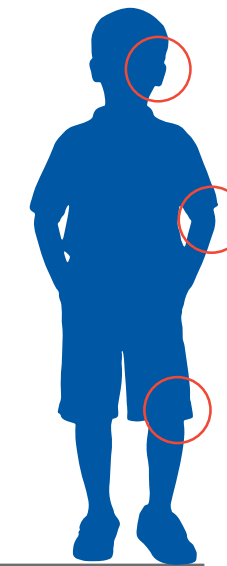

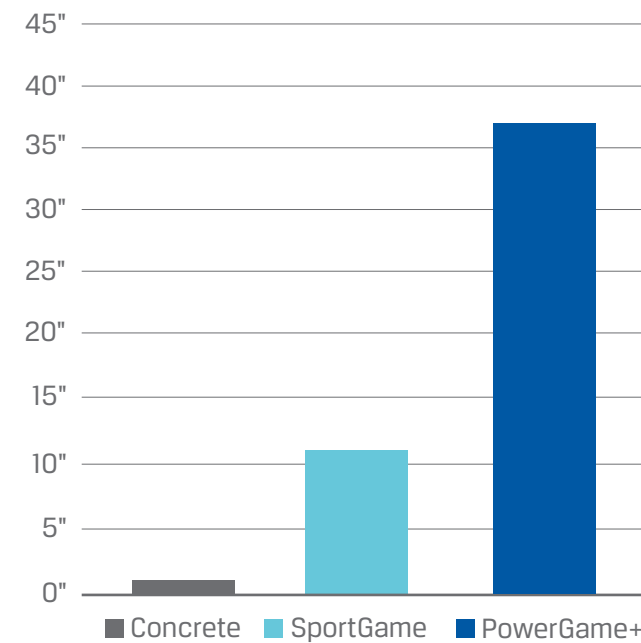

Best Balance Between Skin Abrasion and Traction

Asphalt, concrete and acrylic are much more abrasive and will cause injuries to skin when falling.

Impact Protection Index

The average 7 year old boy is 44" tall.

Superior Impact Protection.

A head impact from four inches above a concrete surface can cause a concussion. Sport Court PowerGame+ tiles are significantly more forgiving and reduce the likelihood of serious head injuries from a fall of 37 inches. PowerGame+ can also protect against impact injuries to wrists, arms, knees and shoulders.

Critical Fall Height is a test used in conjunction with the ASTM 1292 standard for evaluating playground surfaces, such as sand, wood chips, resilient rubber and asphalt.

Your Court. Your Inspiration.

A Sport Court game court not only brings people together, it's customizable to create a perfect visual experience. With a palette of 19 fade-resistant colors, you can easily design the look of your court to fit in with the environment—using earth tones and neutral colors—or stand out with bright colorful designs.

Show Your Colors.

Mix neutrals for an understated, contemporary look. Or use contrasting colors that pop. Take it to the next level with a team or sponsor logo. From inspiration to installation, your local certified CourtBuilder will work with you every step of the way.

Before

After

Ideal for Court Renovation.

Make the most of your existing facilities. Sport Court's patented, interlocking tiles easily overlay outdated concrete, asphalt and acrylic surfaces. Now, you can repurpose underutilized courts and free up space for more sports and recreational programming.

Sport Court tiles come in a wide range of vibrant colors, allowing you to design eye-catching surfaces that enhance your recreation areas. What's more, Sport Court surfaces are guaranteed to look great for years to come with minimal maintenance.

Before

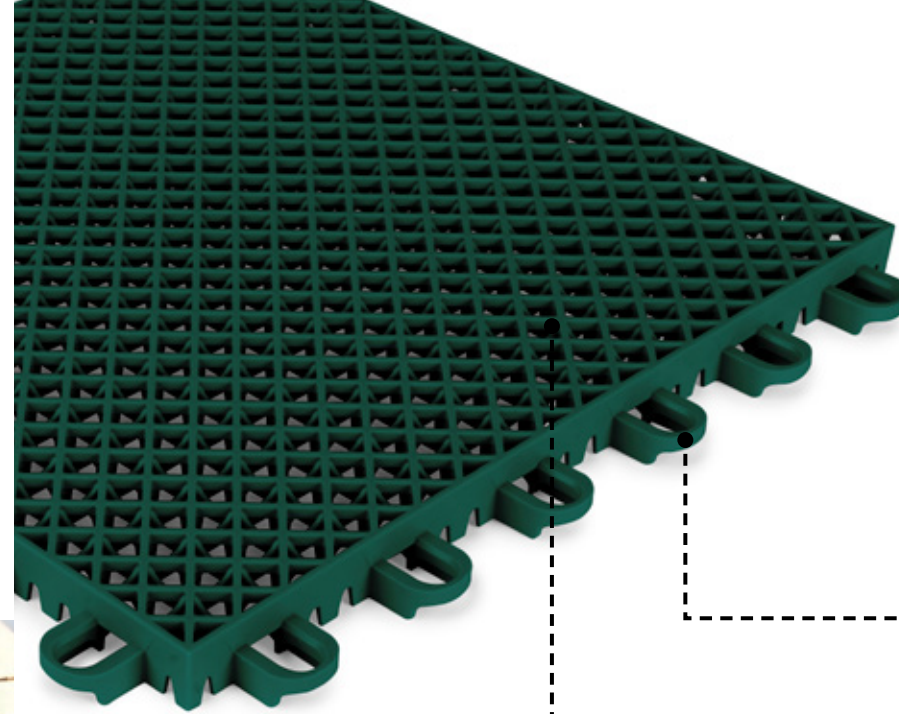

After

The Next Step in Multi-Sport Outdoor Surfacing.

PowerGame+ is the world's best outdoor court surface and the choice for championship competitions around the world. Designed to provide the highest levels of safety and playability, PowerGame+ is the perfect choice for your facility.

- Premium multi-sport modular surface
- Best-in-class UV protection from color fading
- Advanced double-tier design for the industry's highest impact protection
- New triple-action locking system doubles side-to-side locking strength
- All-new diamond grid design for fastest water drainage and lowest water retention

Size	Weight	Head Impact ASTM 1292	Traction EN 13036-4	Ball Rebound DIN 18032
12" x 12" x 0.75"	0.7 lbs	37" drop height pass	99/45 BPN (Dry/Wet)	100% ball bounce

Enhanced Playability.

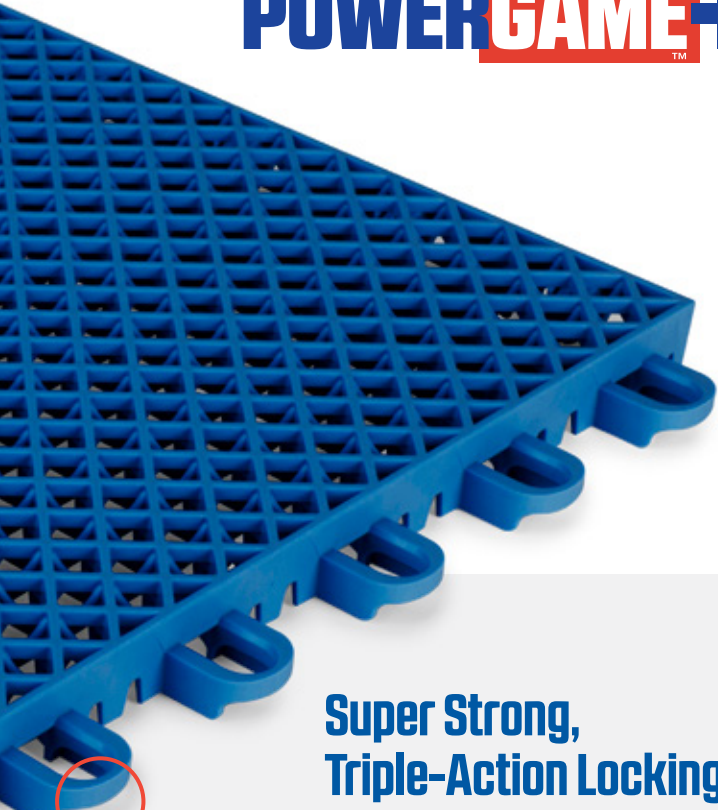

PowerGame+ will outplay any other modular outdoor sports surface. The ball bounce and control is on par with what you'll find on an indoor hardwood court. The strongest tile-locking system in the industry creates a remarkably stable surface. A new grid design improves water drainage and reduces water rebound.

POWERGAME+

Remarkable Durability.

Like all Sport Court outdoor surfaces, PowerGame+ requires very little maintenance. The new color technology and patented UV protection allow for the most vibrant, fade-resistant colors available.

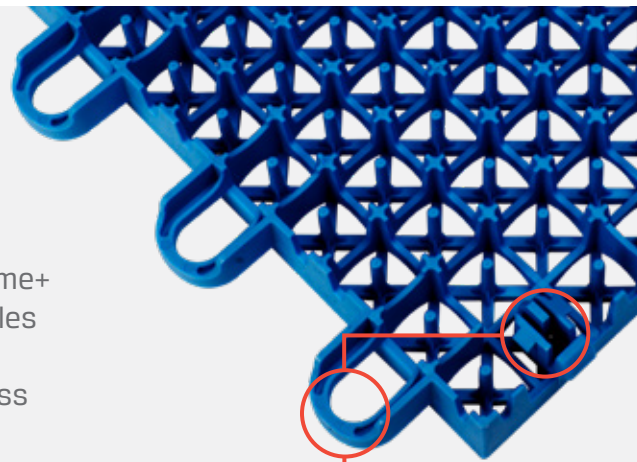

The advanced copolymer tiles are easy to clean, resist moisture and impacts, and are backed by a 15-year warranty.

Super Strong, Triple-Action Locking System.

The new, triple-action locking system for PowerGame+ provides the optimal locking strength to prevent tiles from buckling or unlocking under the weight of athletes—without compromising Lateral Forgiveness or ease of installation.

- Wider, deeper connection loops
- Connects on three surfaces
- Double-wall design for strength and durability
- Unmatched side-to-side locking strength

Improved Water Drainage.

PowerGame+ tiles feature an all-new design for greater wet traction, better drainage and less water retention.*

*Any surface that is wet will have a higher risk of slips and falls. Make sure to play on a dry surface, and, if wet, play with caution.

100%
water drainage

Sport Court modular outdoor tiles have the best water drainage capabilities in the industry.

Stands up to Weather. Stands up to the Sun.

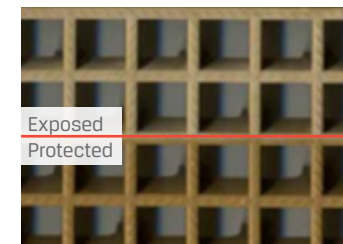

Outdoor courts face harsh conditions, including UV radiation, temperature extremes and humidity, all of which can degrade the court. Partnering with the Mississippi Polymer Institute, Sport Court developed advanced processes, materials and designs to create the best weathering resistance on the market.

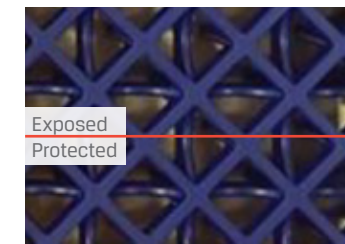

Competitor A
2 years

Competitor B

PowerGame+
10 years

Long Lasting Color Stability.

In accelerated weather testing that simulates 10 years of sun exposure, the colors of PowerGame+ tiles remained vibrant. Competitive tiles faded in as little as 2 years, and all showed significant color fading well before 10 years.

SportGame™

Single-tier design provides playing comfort and impact protection

UV stabilizers and patented formula keeps court playable up to 180°F

Unique grid design for excellent traction and low skin abrasion

Size	Weight	Head Impact ASTM 1292	Traction EN 13036-4	Ball Rebound DIN 18032
9.842" x 9.842" x 0.5"	0.5 lbs	14" drop height pass	102/37 BPN (Dry/Wet)	99% ball bounce

Sport Court Essentials for a Quality Court.

Everything that goes into creating your Sport Court playing surface is designed to meet your needs and expectations today and for years to come. Sport Court delivers:

Low life-cycle cost	✓	Experts in moisture and drainage solutions	✓
45 years of manufacturing	✓	Championship-tested sports performance	✓
15-year warranty	✓	Licensed and insured	✓
Hassle-free, full-service installation by certified CourtBuilders	✓	Manufactured in the USA	✓
Single company from manufacturing to design assistance to installation	✓	Quick installation and easy maintenance	✓
Installed in as few as five days	✓	The surface you need for the sports you play	✓
Independent safety testing	✓	Designed to fit your facility and budget	✓

The Choice of Champions Around the World.

Sport Court surfaces are used at the highest levels of competition by leading sports associations around the world, including the NCAA, FIBA, FIVB, USA Volleyball and US Soccer Foundation.

Sport Court is proud to be a court supplier for many of the world's elite athletic associations.

*NCAA is a registered trademark of the National Collegiate Athletic Association.

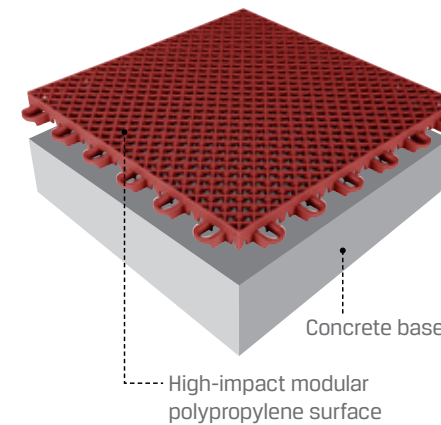

Rely on the World's Largest and Most Experienced CourtBuilder™ Network.

Fiercely committed to quality, Sport Court, unlike other game court manufacturers, only allows authorized CourtBuilders trained by Sport Court to install the world's leading indoor and outdoor modular game surfaces. They live and work in your area, so they understand local building codes, weather and environmental issues. Find your local CourtBuilder at www.sportcourt.com.

Installation and Maintenance

Your local CourtBuilder will be your partner every step of the way. Working closely with you, they will take care of every detail: from design support and installation to responsive support and service for the life of your court.

Installation

Each installation is unique and based on the subfloor properties. It may include pouring a concrete slab to specification, anchoring the court and using ramp edging for safety and security. Your CourtBuilder is equipped to recommend the best solution for your facility.

Maintenance

All Sport Court outdoor surfaces require minimal cleaning and maintenance. You can clean your surface as needed, using a high-pressure hose to remove dust and dirt. Your CourtBuilder can provide a more detailed periodic cleaning and maintenance program customized to your specific site needs.
